## MODARTT releases a Rock piano add-on

Following the recent *Electric Pianos and Vibes* add-ons for PIANOTEQ 3, MODARTT proudly presents the “Rock piano” add-on, modelled from a famous Japanese modern grand piano.

To meet a growing demand for a specific adapted pop/rock piano instrument, MODARTT designed a **Rock piano add-on** for use in PIANOTEQ 3. It is modelled from a modern grand piano produced by a famous Japanese piano manufacturer, frequently seen on stages and praised by touring artists for its musical qualities and reliability.

The Rock piano instrument **YC5** comes with three variants: *Stage*, *Chamber* and *Studio*.

- **YC5 Stage** has a percussive and bright tone suitable for pop/rock mixes and fits also very nicely to dreamy solo ballades.
- **YC5 Chamber** has a coloured and singing tone, well adapted for solos that demand a full and rich timbre.
- **YC5 Studio** models a dry acoustic environment, achieving a particular strong and close presence that is often appreciated in studio production.

Common to the other PIANOTEQ instruments, each variant is provided with several perspectives: *mix recording*, *solo recording*, *close mic*, *player*, *ambience*... They are based on PIANOTEQ's powerful physical model, developed to meet the requirements for all possible situations, from studio sessions to live performances.

### Purchase and download

The Rock piano add-on is provided as an embedded add-on in the latest update of PIANOTEQ 3 for demo evaluation. The Rock piano add-on can be purchased by all PIANOTEQ customers for 29 € and is offered for free in a special summer promotion (until September 30) with all new PIANOTEQ licences. Audio demos and a free trial version of PIANOTEQ 3 are available at [www.pianoteq.com](http://www.pianoteq.com).
