

PRESS RELEASE

Modartt releases **ORGAN**TEQ 2.1 Additional Organs & Expanded Stop Library

Modartt has released version 2.1 of **ORGAN**TEQ, the acclaimed physically modelled pipe organ. This update introduces several new features and improvements designed to offer greater versatility, a richer sound palette, and a more seamless creative experience.

Revoicings and Expanded Stop Library

Additional Organs

The updated organ library includes 14 new organs of diverse aesthetics, ranging from early baroque to contemporary. These thoroughly crafted instruments provide users with a broader selection of styles and sounds to explore, for an even richer musical experience.

Seven new stops have been added to the stop library, including a full set of Romantic Principals, while the French Romantic presets have been carefully revoiced for a more authentic sound. These improvements allow organists to further refine and personalize their organ's tonal qualities, offering more creative possibilities than ever before.

Improved Preset Filtering with the "Tag" Feature A new "Tag" feature makes browsing through presets easier, allowing users to quickly find the perfect sound for their musical needs from a variety of built-in tags. Creation and customisation of user tags is also possible to gain full control over your preset management.
